

2020-2021 City Stop Proposal

Town bus stops allow students residing in the city limits to board a bus in their neighborhood and ride to the nearest attendance center where they can catch a shuttle to their attendance center. To reduce the number of riders on each bus and to run the bus routes in a swift and efficient manner, the USD 434 Transportation Department proposes having one town stop in Overbrook, Carbondale, and Scranton. We are asking the board to require students who live within the city limits to:

- walk to or be dropped off at their local attendance center where they will catch a shuttle to their attending attendance center.
- be dropped off at their attending attendance center.
- go to the one city stop in their town to catch the bus.

Once enrollment is complete, the city stops will be determined and notification will be made to parents.
